

13. NOTES:

A. These prices do not include any transportation costs.

B. ADDITIONAL CHARGES:

1. There is a minimum disposal charge of \$150.00 per waste stream (Profile Sheet Number) per truckload. This excludes empty drums and Lab Packs.
2. Minimum Kettleman Hills (K.H.) spill charge \$100.00 to customer.
3. A \$275.00 waste stream evaluation charge (including tax) will be assessed for each new waste stream. Emergency or priority laboratory evaluation work will require a \$1,000.00 charge (including tax). Drummed waste and waste going to fuels or commercial incineration will not be scheduled on a priority basis. Bulk waste solids evaluations, excluding PCB contaminated wastes, will be assessed a \$110.00 charge (Including tax) whether done on a priority or routine basis. Evaluation charges cover lab work necessary to determine whether a waste stream can be accepted by the facility. There are no evaluation charges for Lab Packs or for wastes that do not require a sample. Please call your local CWM representative for guidance.
4. Bulk solids that experience separation of free liquids during shipment will have a \$500.00 per load stabilization charge added to the applicable bulk solids disposal charge.
5. Drums containing solids must be at least 90 percent full to avoid a \$10.00 drum surcharge.
6. Pallets and other packing material accompanying any containers will be disposed of and billed at the applicable per cubic yard price.
7. Special pricing for small containers of solids will be used if the containers are handled individually. Banded, palletted containers of waste solids described by a single profile sheet will be charged as bulk solids based on the overall largest dimensions of the banded, palletted solids. It is important that there be no liquids on the same pallet as the solids in order to take advantage of this pricing procedure.
8. Taxes and regulatory agency fees that CWM must collect are chargeable at actual cost.
9. The prices contained in this list are based on treatment/disposal practices in effect at K.H. at the time the list is prepared. Your charges will be based on the required treatment or disposal method employed. Unanticipated and immediate changes in treatment/disposal practices required by law or regulation can cause an immediate change in prices that do not allow time for notification.

C. NORMAL WORKING HOURS:

1. Monday through Saturday - Continuously from 7:00 a.m. Monday to 3:30 p.m. Saturday. Saturday delivery drums must arrive prior to noon on Saturday.
